

# UCAS 14-19 Education Products

Working for learners, providers and local authorities

UCAS 14-19 interactive online products facilitate the delivery and management of learning opportunities. The UCAS 14-19 Prospectus and UCAS 14-19 CAP enable...

**learners** to explore and navigate their way easily along learning pathways, so helping them realise their potential

**education providers** to market and manage their provision, track and monitor applications, manage bulk updates, facilitate data sharing, and provide a single point for access and management for national providers

**local authorities and careers agencies** to provide a flexible system, offering interoperability with existing systems, high level reporting, scalability and security, along with customisation to meet specific local requirements.

## UCAS 14-19 products

UCAS 14-19 is a major supplier of education management tools for the 14-19 agenda.

Over five years our products have been rolled out and fully operational in local areas throughout the country. This has given us unrivalled experience in product development and in delivering solutions for what can be complex regional requirements. Currently 26 local authority areas use the UCAS Prospectus and CAP.

Our strong track record and market position ensures that you can be confident in selecting UCAS products to manage your 14-19 delivery. As you would expect, the UCAS products are already well ahead in meeting the requirements set out in the DCSF Action Plan.

The **UCAS Prospectus** enables students to search and select learning opportunities online, in an intuitive and secure environment. At the same time it enables local authorities and providers to present information in a structured but flexible format. This is underpinned with functionality to manage provision effectively and efficiently.

Using the **UCAS CAP** learners can apply online to courses not only within their local area but also across borders into neighbouring areas. The system enables local authorities and personal advisers to manage applications, and use its extensive functionality to manage NEETs, meet the September Guarantee, and inform decision-making and resource planning. Compatible not only with the UCAS Prospectus, the UCAS CAP can also be used with other providers' software.

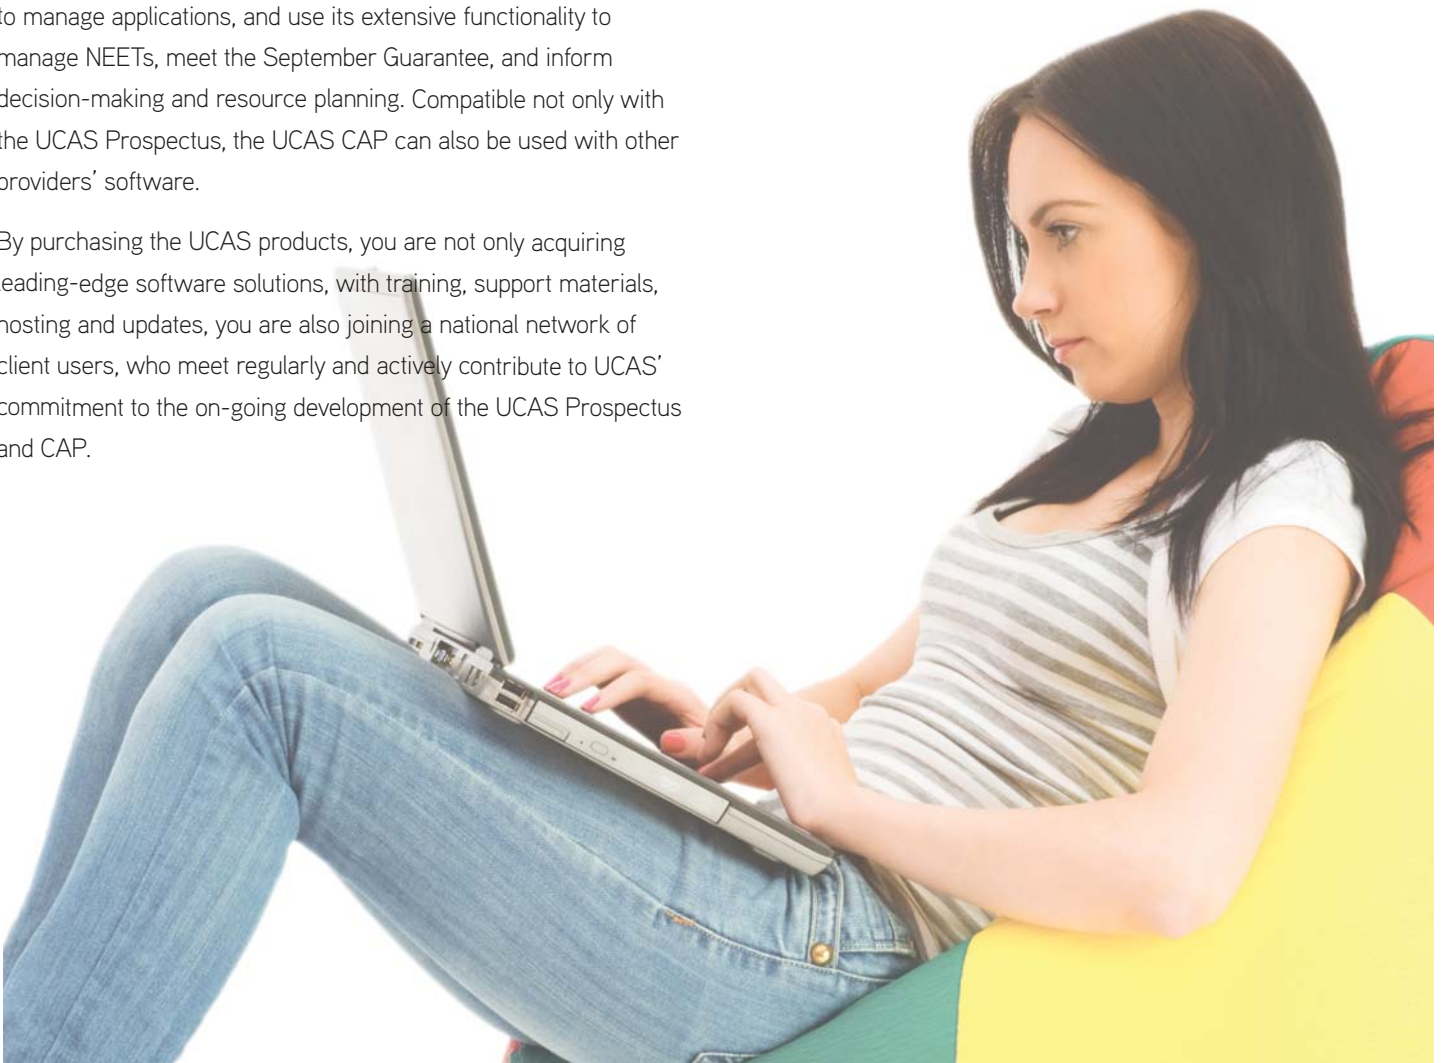

By purchasing the UCAS products, you are not only acquiring leading-edge software solutions, with training, support materials, hosting and updates, you are also joining a national network of client users, who meet regularly and actively contribute to UCAS' commitment to the on-going development of the UCAS Prospectus and CAP.

## UCAS and the 14-19 agenda

UCAS' track record, from providing a world class national admissions service for UK higher education to our role in managing applications for summer schools and running a number of additional student-focused services, means we have a wealth of experience in developing and managing applications and admissions systems. Data integrity and business continuity are at the core of our business processes.

We believe that by combining our experience in HE with our pioneering work undertaken in support of the 14-19 agenda, UCAS 14-19 is uniquely placed to make a positive contribution to the sector through the provision of leading-edge and sustainable products and services.

UCAS has a strong reputation for working collaboratively. UCAS is a charity and not-for-profit organisation, which is already working with government through BIS and DCSF, as well as many of the leading organisations within the 14-19 sector. We see that working together presents the best chance to help shape the future of 14-19 setting.

# The UCAS products offer...

## For learners

### UCAS Prospectus

- An easy-to-use system with intuitive design and search functions
- Simple access to all available courses including cross-border learning opportunities
- Quick and accurate searches of courses and providers via use of intelligent key words, plus a multiple course search function
- The ability to bookmark courses for future review and for submitting applications

### UCAS CAP

- A staged application process from draft through to accepting an offer
- A password protected learner profile area
- Pre-populated learner details to simplify the creation of high quality applications
- The ability to make, manage and track multiple applications
- An opportunity to select courses in order of preference
- The facility to allow a tutor to provide additional support in creating a student's application prior to submission
- A messaging system providing a single point of contact for learners, advisers and administrators
- A number of tools to aid learners with special education needs

## For learning providers

### UCAS Prospectus

- 'Type and go' templates enabling quick updating of course information and provider profiles
- Reporting tools to monitor data quality and demand for provision
- The identification of combinable courses at individual institutions
- A single point of access and management for national providers
- Cross-border functionality allowing more visibility and access to courses and students

### UCAS CAP

- The ability to view and manage applications online
- MIS interoperability to allow integration into existing admissions systems and processes, removing the need for resource-intensive data inputting by providers
- Personalised offers to individual learners
- A secure administration system facilitating fast application response and management
- Intuitive alerts to communicate with users, and automated messaging customisable by individual providers

## For local authorities and personal advisers

### UCAS Prospectus

- The capability to promote a broad range of learning opportunities to all students, with cross-border transparency
- Complete white-labelling to allow your brand to be presented through customisable interfaces, supported by a client-run content management system
- The opportunity to configure contents to present local IAG offerings

### UCAS CAP

- Integration with the area prospectus, including those provided by other vendors
- A fully configurable solution to fit your business processes, capable of scaling from local and sub-regional to regional configuration
- Full cross-border application management with transparent data transfer
- A solution compliant with current government standards, MIAP and XCRI, for flexible data transfer and management
- Control of access levels and authorisation, allowing flexible permissions settings
- Reporting to support NEEs, the September Guarantee, learning access and supply strategies, destination and provision analysis at local area and regional levels
- Security that provides 99.99% network uptime, system auditing and data encryption, plus an active monitoring service

# Implementation and client support

The UCAS 14-19 team has extensive experience in advising, creating, implementing and supporting the Prospectus and CAP. Customisation, guidance and training can be tailored to the individual requirements of clients and their stakeholders.

## Quality and sustainability

UCAS is committed to continuous improvement of its education products and advocates emerging standards such as MIAP and XCRI. We work with clients to plan and achieve an integrated solution that best meets current and ongoing requirements of clients and stakeholders.
