LESS IS MORE

Our new adviser portal replaces Apply for advisers and Adviser Track – giving you complete oversight of your students' applications, in one system – for FREE.

NEW AND EXCITING

We've listened to your feedback and integrated lots of new features, including the ability to sort and filter applicants pre and post-submission – all designed to save you time.

EASY ON THE EYE

As well as new features, we've improved the user interface to help you navigate your way through the system.

QUICK AND EFFICIENT

Once you've hit 'Send', it doesn't end there. Our new adviser portal gives you access to real-time data post-submission, meaning you can see any decisions and offers your students get through UCAS, as soon as they get them.

INFORMATIVE AND INSIGHTFUL

To further help you track the progress of your students' applications, we've revamped our Applicant Status Report. You can now download a list of live application statuses – by groups – at the click of a button.

TRUSTWORTHY AND RELIABLE

Although we've made some big changes, we know there are certain functionalities you can't live without. Don't panic – all the essentials are still there!
