

Managing changes

C. Mandatory changes to qualifications on the Tariff

Mandatory changes are overseen by regulators and government bodies, i.e. changes that awarding organisations have to make to qualifications because of A level reforms, Applied General and Tech Level qualification reforms. The only changes that concern us in terms of Tariff points are changes to its guided learning hours or grading structure¹ because we use these components to calculate the points. The addition of subjects to qualifications on the Tariff does not constitute a change.

¹This includes changes to the grading structure or level of grades. For example, if certain grades were originally pitched at Level 2/SCQF Level 5 and became Level 3/SCQF Level 6, this change would have an impact as Level 2/SCQF Level 5 is not included on the new Tariff.
