31,000 new students will be moving to study in a different country within the UK this autumn.

Here are the major flows between England, Northern Ireland, Scotland and Wales.

Where this year’s new students are set to move from....

Around 378,000 UCAS acceptances from the UK will be studying in England in 2015-16, 9,000 in Northern Ireland, 34,000 in Scotland, and 22,000 in Wales.

UK-country flows for 2015-16

Where this year’s new students are set to move from....

...and this is where they will be studying once term starts.

There are 3,000 more English students studying in Scotland, than there are Scottish students studying in England.

There are 3,000 more English students studying in Scotland, than there are Scottish students studying in England.

5,000 students leave Northern Ireland to study in England and Scotland, but only 300 students from England and Scotland will be studying in Northern Ireland.

8,360 students from Wales will be studying at English universities and colleges - the second largest flow, but smaller than those leaving England to study in Wales.
