## Introduction

The **Assessment Emergency Contact Name and Relationship** detail is collected from the applicants in UC Apply. This value is displayed for the providers in Link Products under the name **Emergency Contact Name**. This field name will be changed in Link Products for the Apply and Link product system to be in line.

Currently this emergency applicant contact detail is available for the providers in:

**xml-link:** getCUKASApplicantsDetails and getCUKASApplicantsDetails\_U

**odbc-link:** ivCStarA and ivCStarAU

## Solution Approach

- Emergency contact details are applicable for the UC applicants. Hence the change is only applicable to UC providers.
- The field Emergency Contact Name in xml-link and odbc-link will be updated.

## Technical Implementation

### xml-link:

- The fields **emergencyContactName** name will be updated in the methods **GETCUKASAPPLICANTSDETAILS** and **GETCUKASAPPLICANTSDETAILS\_U**.
- The xml-link manual will be updated to reflect the new emergency contact label description.

### odbc-link:

- The fields **EMERGCONTACTNAME** name will be updated in the views **ivCStarA** and **ivCStarAU**.
- The odbc-link manual will be updated to reflect the new emergency contact label description.

## System changes

### xml-link:

- The field name **emergencyContactName** will be updated as **emergencyContactNameRelationship** in the methods GETCUKASAPPLICANTSDETAILS and GETCUKASAPPLICANTSDETAILS\_U.
- There are no changes with the datatype of the field.

### odbc-link:

- The field name **EMERGCONTACTNAME** will be updated to **emergContactNameRel** in the views ivCStarA and ivCStarAU.
- There are no changes to the datatype of the field.

### web-link:

- No changes in web-link.

## Deployment Timelines
