1. Overview

Specification for UCAS data for HESA transaction (formerly *J UCAS transaction) for 2021-22

a. Basis of specification

This transaction is designed to provide data available from UCAS in a format suitable for use in providers' HESA Student record. This specification describes the fields that will be included in the transaction, and the translations from UCAS to HESA coding conventions.

The HESA data requirement is published as part of the coding manual and is available at: <https://www.hesa.ac.uk/collection/c21051>

b. Providers' access to transaction

Providers will be able to obtain this transaction from UCAS through.

- (a) A flat-file structure
- (b) ODBC link directly into tables
- (c) XML link
- (d) for web-link users, as export file Applicant Data 3 (HESA Student Return details) available via the Management Information menu and then the Export Data menu option

c. Timing

This transaction will be available from UCAS at the end of an application cycle once examination results are confirmed. Release for 2021 is planned for November 2021.

d. Structure

The structure of the transaction is one record per admitted student. This UCAS transaction cannot be split into an entity structure. So, for example, course-related information is provided assigned to each student according to course applied for and qualifications are provided as a repeating group of fields, as a starting point for providers.

e. Coverage

*J will be provided to providers for all students admitted in an application cycle for a given year for the following students:

1. all placed applicant undergraduate students in main UCAS system and all integrated master's degree students in main UCAS system
2. all placed applicant undergraduate students in UCAS Conservatoires (UC)
3. all placed applicant students in UTT

Note that deferred students will be included in the *J transaction of their year of application, and every subsequent year for which the student is a live applicant (e.g. for a student applying in 2017 for deferred entry in 2019, the student will appear in the provider transaction for 2017, 2018 and 2019).

Note also that UTT has a restricted range of data (see specification for details) and is only available for applicants to that institution and for any institution where they are the accrediting provider, it does not contain Schools Direct data in the accrediting providers StarJ.

Certain field coverage is restricted by HESA validation to undergraduate or postgraduate courses. UCAS will use the course assignment provided to them by providers for this classification and consequent supply of data.

HESA has some validation that only requires data for students with domiciles or for providers in particular countries. UCAS will however pass on to providers data for all students that have provided it.

3. Housekeeping

a. Document Change Control

Date	Author	Version	Reason for update	Date distributed
14/07/2021	UCAS	1.0	New version for 2021 generated	
16/07/2021	UCAS	1.1	Added new quals to Appendix G	
16/08/2021	UCAS	1.2	Release for publication	

4. Changes to data specification

HESA will notify UCAS of any changes to the specification of this transaction by the December preceding the reporting year it is relevant to (e.g. December 2010 for 2011/12 HESA reporting year).

UCAS will notify HESA of any changes to their processes and codes affecting this transaction by the December preceding the reporting year it is relevant to (e.g. December 2011 for 2012/13 HESA reporting year).

HECoS codes

For courses rolled over in 2019 in our collection tool, we brought over the JACS codes as read-only and HECoS codes became mandatory for these. New courses added for 2019 and subsequent years will only have HECoS codes, so it's possible for reduced coverage of JACS for applicants associated with these courses.

While we understand the possible value of adding HECoS codes to this data, it felt more prudent to wait until the development of HESA Data Futures, when HECoS can be incorporated into a fuller set of changes to the specification.

2021

New Qualent3 value added for P58 T - Levels. Although this value has been assigned by HESA, results will not be verified via ABL process until 2022

2020

HESA have confirmed that there are no changes for UCAS to apply to StarJ for 2020.

2019 (*incl for reference*)

HESA have confirmed that there are no changes for UCAS to apply to StarJ for 2019.

International A and AS levels were incorrectly flagged as subject to Tariff for the calculation of the associated QUALENT3 values for StarJ 2018. The qualifications affected were:

Qual type	Description
I5	Cambridge International A level
I6	Cambridge International AS level
I7	Pearson Edexcel International Advanced level
I8	Pearson Edexcel International AS level
I9	Oxford International AQA AS level

We advised that you checked the QUALENT3 values for any applicants that have International A and/or AS levels (either on their own, or as a mixture of other qualifications). The correct values that should have been applied, and their descriptors are listed in full below:

QUALENT3 value	Qualification type
P92	Level 3 qualifications of which none are subject to UCAS Tariff
P93	Level 3 qualifications of which all are subject to UCAS Tariff
P94	Level 3 qualifications of which some are subject to UCAS Tariff

These have now been correctly flagged as not subject to Tariff for StarJ 2019.

*** The Kingdom of the Netherlands comprises the European country of The Netherlands (NL); the Caribbean country of Aruba (AW), and the former island territories of the Netherlands Antilles: Curaçao (CW); Sint Maarten (Dutch part) (SX); and the combined special municipalities of Bonaire, Sint Eustatius and Saba (BQ).

On October 10th 2010, the Netherlands Antilles (AN) was dissolved and its constituent island territories became constituent countries or special municipalities of the Kingdom of the Netherlands in their own right. Consequently, the Netherlands Antilles (AN) has ceased to be a valid code for entrants from 2011/12 onwards in DOMICILE, and has been superseded by the following codes:

CW Curaçao

SX Sint Maarten (Dutch part)

BQ Bonaire, Sint Eustatius and Saba

Codes 13, (White - Scottish), 16 'White – Other British' and 19 (Other White background) are available to providers in Scotland only. **These codes are not collected by UCAS but must be used when appropriate by providers in Northern Ireland or Scotland.**

The HESA codes available for use by providers in England for Apprenticeship Standards students differ slightly from those for other students at providers in England. Code 10 'White' must not be

used, and codes 11 'White - Irish' and 12 'White - English, Welsh, Scottish, Northern Irish, British' are provided instead. 19 'Other White background' is additionally available. This aligns with the coding structure used by the Skills Funding Agency.

Codes 11, 12 & 19 are not collected by UCAS but must be used when appropriate by providers in England.

Appendix F – EntryProfile.QUALENT3

The QUALENT3 value in the *J uses three indicators to help find the Highest Qualification on Entry. Each of these indicators is derived in a different way before being brought together for the QUALENT3 calculation. The three values are:

HIQE
HIQA
Best ABL

For the below values and for the calculations used in the *J the “highest” or “best” qualification is defined by taking the QUALENT3 coding frame as a hierarchy. Therefore, the closer to the top of the coding frame a qualification sits the higher or better it is. For example; P50 will be taken over P62 as it is nearer to the top of the coding frame. It should be noted that the hierarchy structure does not extend to the qualifications within the categories (e.g. no distinction is made between A Levels and AS Levels as they are both P50 qualifications).

HIQE

This is the Highest Qualification Expected. This value is calculated from qualifications entered by the applicant in Apply; specifically, qualifications where they have entered a grade of “Pending”.

If the applicant has not entered any expected qualifications the value will be X06 (Not Known).

HIQA

This is the Highest Qualification Achieved. This value is calculated from qualifications entered by the applicant in Apply; specifically, qualifications where they have entered a grade.

If the applicant has not entered any achieved qualifications the value will be X06 (Not Known).

HIQA and HIQE do not use codes P92, P93 or P94.

Best ABL

This is the Highest Qualification received through the Awarding Body Linkage process. These are verified results that UCAS obtains directly from the Awarding Bodies.

If an applicant does not have any ABL qualifications the value will be X06.

Calculation Process

This first part of the calculation will set either a FINAL or PROVISIONAL QUALENT3 value. If a PROVISIONAL value is set it will then determine whether a value of P92, P93 or P94 needs to be returned. P92, P93 and P94 are special Level 3 codes that indicate the following:

P92 - Level 3 qualifications of which none are subject to UCAS Tariff

P93 - Level 3 qualifications of which all are subject to UCAS Tariff

P94 - Level 3 qualifications of which some are subject to UCAS Tariff

Level 3 qualifications are those with a “P” code.

The initial calculation is as follows. It performs each rule in turn until the FINAL QUALENT3 is established:

IF HIQE is better than HIQA and Best ABL and above Level 3

Set HIQE as FINAL QUALENT3

IF Best ABL is equal to or better than HIQA

Set Best ABL as PROVISIONAL QUALENT3

ELSE

Set HIQA as PROVISIONAL QUALENT3

IF PROVISIONAL QUALENT3 is not at LEVEL3

Set PROVISIONAL QUALENT3 as FINAL QUALENT3

ELSE

Check for P92, P93, P94

NOTE: Due to the fact that it is possible for QUALENT3 to be set by qualifications entered in Apply only, HEIs should make sure that their students have the right qualifications. This may apply to any QUALENT3 (but in particular those above Level 3).

P92 / P93 / P94 Check

As part of the P92, P93 and P94 check the *J will look at all Level 3 qualifications both entered in Apply and received via ABL.

IF number of unique Apply and ABL Level 3 QUALENT values combined are = 1

Set PROVISIONAL QUALENT3 as FINAL QUALENT3

ELSE

IF all Apply and ABL qualifications that are at Level 3 are on the UCAS Tariff

Set P93 as FINAL QUALENT3

ELSE

IF all Apply and ABL qualifications that are at Level 3 are not on the UCAS Tariff

Set P92 as FINAL QUALENT3

ELSE

Set P94 as FINAL QUALENT3

NOTE: From 2014 HESA have requested the following:

No UK qualifications should be given a code of P80. Therefore, if a Provisional QUALENT3 of P80 is set in step one, before a Final QUALENT3 is set *J will look at whether the highest qualification is in the Tariff. If it is P93 is set as Final, if not P92 is set as Final.
