Introduction to UCAS predicted grades report

Last year UCAS launched the Historical entry grades data, which allows students, along with their teachers and advisers, to see both offer rates and the historic grades held by previous successful applicants on admission to a particular course, in addition to the listed entry requirements published by universities.

To date, the tool has been used over two million times, with 73% of advisers observing a positive impact on students' understanding of their next steps, and 80% found the tool easy to use.

In response to requests for more support in respect of predicting grades for UCAS, this area is the focus of the next phase of our transparency work. UCAS understands that it is difficult to make UCAS predictions, and that predictions exist within the schools and college system for a broad range of purposes. Nevertheless, the longer-term trend has seen the gap between the predicted grades used for university admission and achieved grades widen, meaning that universities are increasingly finding them difficult to interpret. This is especially the case with the highest grades, with around half of UK 18-year-olds predicted AAA and above. That said, the mean predicted grades of 18-year-old applicants from the UK applying by the UCAS equal consideration deadline in 2025 were the same as in 2024.

We know this is a complex and sensitive issue, with many factors influencing UCAS predicted and the ultimate achieved grades. These reports, developed as part of a pilot initiative, are intended to provide more support on this matter to teachers and advisers. The report will provide advisers with the ability to benchmark their UCAS predictions, along with a range of information regarding UCAS predictions.

This first iteration of the report will include 2024 End of Cycle data on 18-year-old applicants domiciled in England, Wales, and Northern Ireland with at least three A levels from their school or college. Plans are already in train to expand the range of qualifications included within the reports.

UCAS' hope is that the launch of these reports, combined with the Historical entry grades data, will support advisers in guiding students toward courses and universities that best suit their needs, while also providing efficiencies for staff already managing high workloads.

These reports have been designed following extensive consultation with advisers, schools, universities and colleges, and the wider sector. They have been issued as part of a pilot, and we would welcome your feedback on their usefulness and how they can be improved. Please send any feedback you have to: adviserhelp@ucas.ac.uk

Support
To support your use of these reports, UCAS has published a range of resources to support the use of the reports, along with guidance on where it would not be appropriate to use them - such as for performance or accountability purposes. The range of content available, including FAQs and video walkthroughs, can be found here: https://ucas.com/advisers/pred

Confidential analysis for Registered centres
99999 School of Samples
This report contains 2024 end of cycle data on all 18 year old applicants domiciled in England, Wales and Northern Ireland. For sections A to C, only applicants with at least three UCAS predicted and achieved A levels from your registered centre are used. For section D, any applicant with a UCAS predicted A level in the subject group of interest is used.

Only the highest three grades are considered for sections A to C; A level grades are not necessarily matched by subject. For section D, individual subject groups are considered. The predicted grades used in this report are the predicted grades submitted as part of the UCAS application. All percentages are rounded to nearest whole number therefore summing across bands may not add up to 100% or the total boxes in the summary.

This report is a pilot and is subject to change from feedback.

Note: All sector level numbers are rounded to the nearest 5.

Note: To avoid the disclosure of information about any individual not from this centre the following measures are taken:
- Sector percentages are reported as 0% if the numerator is less than 3.
- Sector percentages are reported as 100% if the numerator is less than 3 of the denominator.
- In Section D, sector bars for a particular subject group/UCAS predicted grade combination are suppressed if it contains less than 50 applicants.
- Within a subject group/UCAS predicted grade combination, sector level prediction band categories are suppressed if there are less than 3 applicants in them. The remaining sector level prediction band categories for that subject group/UCAS predicted grade combination are proportionally redrawn to cover the full length of the chart.

Summary

Percentage of your eligible 2024 applicants with a prediction band across 3 A levels within 1 grade:

You	Sector
30%	**33%**

Total number of your eligible 2024 applicants with at least 3 UCAS predicted and achieved A levels: 393

Percentage of your eligible 2024 applicants with at least 3 UCAS predicted and achieved A levels: 61%

Proportions of your eligible 2024 applicants in each prediction band across 3 A levels
	You % (Sector %)
<-3 grades	33% (29%)
-3 grades	15% (17%)
-2 grades	19% (19%)

Total number of your eligible 2024 applicants with a UCAS predicted A level in a subject group: 528

Percentage of your eligible 2024 applicants with a UCAS predicted A level in a subject group: 82%

Three subjects with the highest proportion of achieved grades aligned with UCAS predicted grades

Subject	You	Sector
Spanish	60%	30%
Modern European Languages	52%	34%
Film And Television Studies	50%	41%

Three subjects with the lowest proportion of achieved grades aligned with UCAS predicted grades

Subject	You	Sector
English Language And Literature	0%	29%
Creative Arts And Design	9%	26%
Photography	10%	41%

Notes on summary: Eligible applicants are 18 year old applicants domiciled in England, Wales or Northern Ireland. For the subject rankings, only subjects with at least 5 applicants are considered (the full subject tables in section D will show all subjects with at least one applicant).

A. Applicants by prediction band (you vs sector)
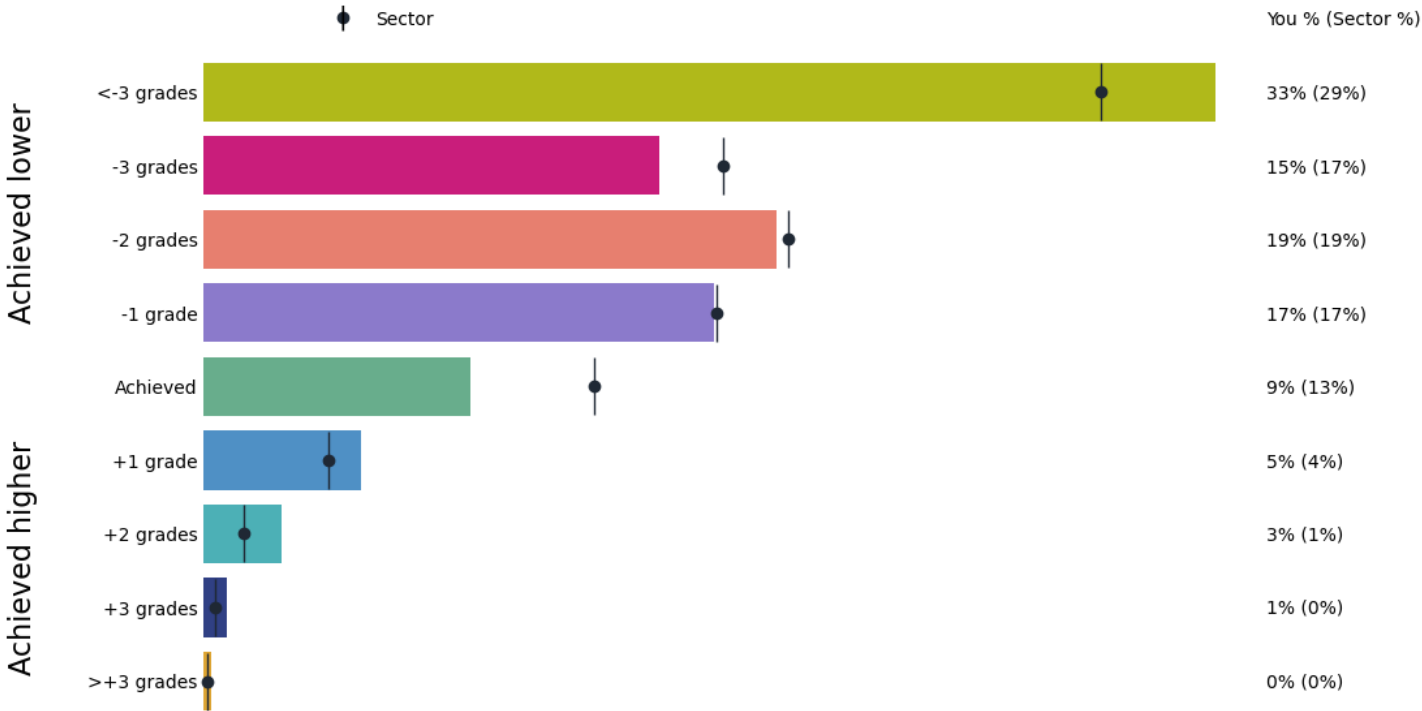

Total number of your applicants in Section A results: 393

A.1 Proportions of applicants in each prediction band across 3 A levels (2024)

The chart above shows the proportion of applicants in each category as a percentage of all 18 year old applicants domiciled in England, Wales and Northern Ireland with at least three UCAS predicted and achieved A levels from your registered centre for the 2024 application cycle. The highest 3 grades are considered only; A level grades are not necessarily matched by subject. The difference between UCAS predicted and achieved A level grades is across all 3 A levels, not individually by A level.

The categories are:
Achieved more than 3 grades below predicted - where the achieved grade is more than three grades lower than the UCAS predicted grade;
Achieved 3 grades below predicted - where the achieved grade is three grades lower than the UCAS predicted grade;
Achieved 2 grades below predicted - where the achieved grade is two grades lower than the UCAS predicted grade
Achieved 1 grade below predicted - where the achieved grade is one grade lower than the UCAS predicted grade;
Achieved predicted - where the applicant has achieved their UCAS predicted grade;
Achieved 1 grade above predicted - where the achieved grade is one grade higher than the UCAS predicted grade;
Achieved 2 grades above predicted - where the achieved grade is two grades higher than the UCAS predicted grade;
Achieved 3 grades above predicted - where the achieved grade is three grades higher than the UCAS predicted grade;
Achieved more than 3 grades above predicted - where the achieved grade is more than three grades higher than the UCAS predicted grade.
See table below for examples of achieved grades by prediction band:

Examples of achieved grades by prediction band for UCAS predicted grade profile of BBB

Prediction Band	Example UCAS Predicted Grade	Example Achieved Grades
Achieved more than 3 grades below predicted	BBB	CCD, CDD, CDE
Achieved 3 grades below predicted	BBB	BCD, CCC, BBE
Achieved 2 grades below predicted	BBB	BCC, BBD, ACD
Achieved 1 grade below predicted	BBB	BBC, ACC, ABD
Achieved predicted	BBB	BBB, ABC, A*CC
Achieved 1 grade above predicted	BBB	ABB, AAC, A*BC
Achieved 2 grades above predicted	BBB	AAB, A*BB, A*AC
Achieved 3 grades above predicted	BBB	AAA, A*AB
Achieved more than 3 grades above predicted	BBB	A*AA, A*A*B, A*A*A

A.2 Proportions of applicants in each prediction band across 3 A levels (2024)

Prediction Band	You	Sector	Difference	Proportional Difference
Achieved more than 3 grades below predicted	33%	29%	4pp	13%
Achieved 3 grades below predicted	15%	17%	-2pp	-12%
Achieved 2 grades below predicted	19%	19%	0pp	-2%
Achieved 1 grade below predicted	17%	17%	0pp	-1%
Achieved predicted	9%	13%	-4pp	-32%
Achieved 1 grade above predicted	5%	4%	1pp	NA
Achieved 2 grades above predicted	3%	1%	1pp	NA
Achieved 3 grades above predicted	1%	0%	0pp	NA
Achieved more than 3 grades above predicted	0%	0%	0pp	NA

In the table above, proportional differences are suppressed if the proportion of the sector in the prediction band is less than 5%. In the difference column, pp refers to percentage point difference (e.g. the difference between 10% and 8% would be 2pp if 10% was you and 8% was the sector)

D. Prediction band per individual UCAS predicted grade by subject

The A level subject groups broadly relate to the Joint Council for Qualifications A level Subjects or are based on existing subject titles. For this section, any applicant with a UCAS predicted A level in the subject group of interest is used. Please note: Some smaller A level subjects may not map to a subject group and as such would not be included in this section of the report.

Technical notes and definitions

Cycle
The year in which the application was processed, rather than entry year.

Applicant
A person who has made an application in the UCAS system during the cycle reported. This includes those who submit applications for deferred entry.

Main scheme
The main UCAS application scheme through which up to five providers/courses can be applied to. This opens in September and closes to new applications on 30 June the following year.

A level point score
A level grades are assigned points such that grade A* = 6 points, A = 5, B = 4 ... and E = 1. UCAS Predicted A level grade profiles of applicants are assigned the total number of points of their best three UCAS predicted grades. For example, a grade profile of AAB would be worth 14 points. A levels are taken mainly by young people in the UK. The A level is the most common qualification held by applicants to the majority of UK HE providers.

A level point scores and profiles
Variables relating to A level profiles and A level point scores are only available for 18 year old applicants domiciled in England, Northern Ireland and Wales, any applicants outside of this cohort will be assigned the value 'Not applicable'. A level point scores are calculated purely for analytical purposes and do not relate to the UCAS tariff.

UCAS Predicted A level grade profile
The UCAS predicted A level grade profile entered on the application. The highest 3 grades are considered only.

UCAS Predicted A level point score
A points score attached to the UCAS predicted A level grade profile entered on the application. The highest 3 grades are considered only.

Achieved A level grade profile
The highest 3 A level grades achieved by the applicant as identified either on application or through Awarding Body Linkage process. A level Double Award grades are included, AS Level grades are not included. The profile represents the qualifications recorded as held by the applicant at the end of the cycle to which the statistic relates.

Achieved A level point score
A points score attached to the highest 3 A level grades achieved by the applicant as identified either on application or through Awarding Body Linkage process. A level Double Award grades are included, AS Level grades are not included. The score represents the qualifications recorded as held by the applicant at the end of the cycle to which the statistic relates.

Difference in achieved and UCAS predicted A level point score (Applicant level)
The difference between the achieved A level point score and UCAS predicted A level point score. This is only applicable to those with at least 3 UCAS predicted and achieved A level grades. The highest 3 grades are considered only; A level grades are not necessarily matched by subject. AS Levels are not included. Zero points refers to those who were predicted the same number of points as they achieved.

Difference

The percentage point (pp) difference between your predicted band proportions and the predicted band proportions of the benchmark. A typical benchmark will be the sector.

Proportional difference

The relative difference between your predicted band proportions and the predicted band proportions of the benchmark. A typical benchmark will be the sector. This indicates by how much your predictions differ to the benchmark.

Individual achieved A level grade

A points score attached to the highest A level or A level Double Award grade achieved by the applicant for subjects grouped within the stated subject.

Individual UCAS predicted A level grade

A points score attached to the highest A level or A level Double Award grade predicted for the applicant for subjects grouped within the stated subject - considering only predicted qualifications declared on the application.

Difference in individual achieved and UCAS predicted A level grade

The difference between the highest UCAS predicted points score declared by the applicant on the application and the points score attached to the highest A level grade achieved by the applicant - as identified either on application or through the Awarding Body Linkage process - considering only subjects grouped within the stated subject.

A Level subject groups

The A level subject groups broadly relate to the Joint Council for Qualifications A level Subjects or are based on existing subject titles. Some smaller A level subjects may not map to a subject group and as such would not be included in section D of the report.
