UCAS AMP SHELL SCHEME STRUCTURE

AMP SHELL SCHEME STRUCTURE

- The Shell Scheme is the standard modular exhibition booth that UCAS uses at premium and shell scheme exhibitions.
- From October 2025 and beyond UCAS will be updating the type of shell scheme framework to the GES AMP system from UCAS scheme supplier GES.
- This updated modular stand system is designed to create a more impactful exhibition experience and offers several benefits including:
 - **Faster, Easier Build:** Streamlined installation means quicker turnaround times for build and breakdown
 - **Modern, Open Design:** Creates a brighter, more inviting environment that enhances visitor flow and engagement.
 - **Enhanced Safety:** A beam-free structure eliminates the risk of failing components.
- This document outlines the branding specification sizes for varying stand sizes. Existing graphics can be attached to the new GES AMP system but UCAS recommends checking graphic sizes against the updated AMP specification.
- To allow for variances between stand location UCAS recommends using the mid row specification which will fit end of row and mid row.
- This document includes Create Your Future exhibitions where a 3m x 3m standard stand size is used (pages 3 – 8) and Discovery exhibitions where a 3m x 2m standard stand size is used (page 9 – 13)
